

I. Installation Notice

1. Install water supply lines in accordance with this manual.
2. Floor drain should be installed in the location of the faucet.
3. Install the faucet only after the completion of house interior decoration in case paint or other chemicals erode the faucet surface.
4. Clean pipes to get rid of mud, sand or other debris blocked in pipes.
5. Wrap the thread part with Teflon tape before it is screwed. To avoid damage to the faucet, use a piece of cloth as a pad between the wrench mouth and the faucet. (Check whether the threads can be matched. Otherwise, too strong force applied to the wrench will damage the faucet).
6. After installation, check all the joints to make sure they are firmly connected. Then keep water flow. Turn on and off repeatedly to ensure there is no leakage around the joints. At this stage, the product is ready for normal use.
7. Keep the manual to the user.

II. Operation Notice

1. The product is used between water pressure 0.05~1.0MPa, water temperature 4~90°C.
2. Do not hang heavy things on the faucet.
3. Make sure the faucet is off when no water comes out of it (especially when nobody resides in the house or during the period of decoration or the absence of water).
4. Regularly clean the surface of faucet to keep it bright. Attention: do not use inappropriate tools such as sharp brushes, rough sponges, scouring pads or corrosive detergent to clean the faucet, and we do not recommend that you use the detergent sold in the market, because its formula is changing frequently. Please clean the faucet by a wet cotton cloth with soapy water, then rinse and dry with a soft cotton cloth after each time of usage.
5. When the room temperature drops to below 0°C, take necessary measures (such measures as keeping faucet warm and closing windows) to prevent the faucet from being frozen and even broken (especially when windows kept open for air ventilation while nobody resides in).

6. First turn on cold water, then hot water. To avoid scalding, regulate the water temperature before washing or showering and do not touch the faucet of hot water part.
7. Do not disassemble the product unless you are an expert.

■ Installing Steps

1. Screw the steel braided hoses and the threaded shank onto the faucet body and tighten them. Insert the lift rod into the slot on the back of the faucet body.
2. Put the escutcheon on the faucet body, slide them through the lavatory hole, pad the rubber washer and the fixation washer in turn and fix them with mounting nut.
3. Install the waste set, connect the lift rods.
4. Connect the steel braided hoses and the triangle valves with the hot water supply on the left and the cold water supply on the right.
5. Install the spout, tighten the M4 screw, then rotate the hole of screw collar to the back of spout.
6. Turn on water for inspection.
